

# Unit 13 — Networking

2025 English for Information Technology. All rights reserved.

## Authenticate

to verify that someone is really the person they claim to be

"The computer was very slow and took nearly 10 seconds to authenticate a user."

## Bluetooth

an open wireless protocol for exchanging data; primarily used for connecting mobile devices to computers

"The man used Bluetooth technology to create a personal area network (PAN) between his mobile phone and his computer."

## Client-server

a networking model in which the functions are divided between "child" computers and a single "parent" computer which stores and controls access to data

"A standard protocol such as TCP/IP or IPX is used to define client-server interactions."
