Unit 21 — Artificial Intelligence

© 2026 English for Information Technology. All rights reserved.

Ambiguous

having more than one possible meaning; unclear

"The instructions were so ambiguous that the team members all interpreted the task in different ways."

Automation

using technology to perform tasks with minimal human intervention

"Many industries increasingly rely on AI-driven automation to increase efficiency and reduce costs."

Bias

poorly-formed ideas or practices that cause unfair results

"Managers must check datasets for bias to avoid discrimination in hiring new employees."
